MEMORANDUM ON SITUATION IN MISSISSIPPI

Atrocities against workers for civil rights continue to be everyday occurrences in Mississippi.

Little is done about this because the world outside Mississippi does not hear about the problem. It is believed, however, that an informed public will bring about action to correct this situation.

The Student Nonviolent Coordinating Committee (SNCC), which bears the brunt of the struggle in Mississippi, has prepared the enclosed fact sheet on the atrocities in just one city.

It is sent to you for your information and with the hope that you will share its contents with others. You will receive similar material from time to time from SCFF and from other sources.
