Surveys for classroom attendance were done by the Campus Communication Center, S.F. State, during the month of January. The communication center is an organization recognized as neutral by both the administration and striking groups. The figure for "classes scheduled" was taken from the class bulletin and did not include classes which were not scheduled at the time of the publication of the bulletin. Attendance figures were done by a room to room survey in each building, and an actual head count of people in those classrooms. This information was put in the communication newsletter and distributed to the campus. Below are reprints from some of those newsletters:

Newsletter dated 1/13/69, attendance check between 1-2p.m. previous Friday.
