## Suggestions of Points to Include in Letters to Trustees & Legislators

1. A college cannot operate where all freedoms of expression by faculty & Students are suppressed by military force & violence
2. A relevant education must be provided for all students in order to create a democratic Society where all are free and can live in peace & harmony
3. Police and military on a college campus cause intimidation & disruption which make an education impossible.
4. I want immediate legislation passed which will give financial assistance to the state colleges to enable them to carry out specific programs for the purpose of providing an education relevant to our times
5. As a community member I believe that the demands of the B.S.U. at S.F.S.C. is a first step toward creating a more relevant educational curriculum on our college campuses.
