Atlanta 14 Ga.

Cannell

Dear Mr. Forman,

As a trained and experienced social group worker I am particularly interested in the community center phase of your work. I know how individuals can grow through group identification and experience.

I wonder, along with some of my colleagues, how we can be of some help. Would it help if some of us assumed

responsibility for providing a particular center with some program supplies and equipment? Would it help if we sent some material for staff use such as: ideas for program, literature on group leadership? Could we serve as consultants i.e.: staff of the particular center has a problem with a certain individual, age group, or type of program - they ask us - we try to answer via tape.?

I would like to hear from you on this matter. If you have some other needs or ideas let me know. If you have a center in mind - please send me the name of staff member, address, telephone number if possible.

I look forward to your reply.

Sincerely yours,

Ted Levine
