Miss Beryl Banfield
82 788 Columbus Avenue
New York, N.Y. 10025

Dear Miss Banfield:

Sorry not to have written directly to you before, explaining my ideas, but things were hectic, so I took the easy way out and sent carbons. I recently got a carbon of a letter Paul Lauter wrote to you. I hope that you will be interested in publishing the Africa Handbook, because we would very much like QUANTITIES of them, and besides, we think it has value for other people and other Freedom Schools. So I hope you overlooked the rather arbitrary way I handled it.

Please keep me informed with whatever happens to the handbook. Thanks for your help in the past. As you probably noticed in ~~the~~ the letter I sent Paul, we are now down to one precious copy in the office, and perhaps two or three in the field, but we hope to be getting more of the handbook in the future. And wherever those handbooks are that you gave us at the beginning of the summer, I hope they are going some good.

Yours truly,

(Miss) Lois Chaffee

enclosure: I hope you will be interested in the enclosed material.
