OVERALL RE. CFT, SCUTHNEST GECRGIA Roy Shields, Jr., Froject Director

FEBRU..RY, 1965

The summer of '64 led us into 20 counties and 5060 square miles of 2nd Congressional District, with the purpose of supporting CB king's candidacy as a vehicle to increase the political awareness and voting potential of the Negro populace in Southwest Georgis.

Despite harassment, a lack of funds and personnel, that staff of dedicated young people (handy battle, Joyce Barrett, Fhil Davis, Pete deLissovoy, Ernie mellillan, John Ferdew, Robert mants, George Bess, John Mashington, Herman Kitchen, Acy Shields, Jr., Tom Brown, Isago Simpkins, Gwin Prown, Amanda B. Ferdew, willie Ricks; directed by Donald Harris) succeeded, in two weeks of he I King for Congress campaign, in registering andestimated 2500 Wegroes and increasing the 2nd District's Negro wting potential to 20% of total vote (while and megro vote combined) (there are of course many more Negroes still to be registered). In the middle of King's campaign, the President signed the Civil Rights Act, which drew us into or anizing public accommodations testing. ...s a resusit of our tireless and dedicated efforts, we had succeeded in milding a political machine, COPA (2nd District Comm. on Folitical ... oticn), and a greater awareness and feeling of unity. Regretably, the King for Congress Campaign and the recently-signed Civil Hights Bill left the worst and most frustarating problems unsolved. The problems are discrimination in employment, underemployment, and poor educational facilities.

"The central problem is tht we have not gone deeply enough inot the communities we are working in....we haven't helped to create any autonomous institutions which will give meaning to the shout for freedom." said John Perdew. We haven't as yet put into the hands of the black masses of SWGa. any institutional way of articulating their hopes, needs, pains, desires, frustrations or grievences. In this regard we've failed. However, this failure is and shall be, for sometime to come, complicate by the fact that the populace is transitery and there is a great exodus of Negro youth from the county to the country village to the large Northern urban ghettoes. In this regard it is difficult to build within the Southern community, especially in Couthwest Georgia, a permanent institutional machine capable of giving meaning to the battle ory "Freedom Now."

After giving our souls, hearts, minds, and bodies to the King campaign and public accommodations, seemingly without appreciable success (even the most facilities, in "Ibany, at least, desegregated, people still can't afford to use them; and none of the underlying reasons for this have been corrected). the SLGa staff was almost completely demoralized and shortly thereafter geganto leave the state.

And then came the enormously electrifying jolt of Bon Harris' leaving for Africa. We rationalized it off by saying to ourselves, "He'll come back and we'll raise hell again. By this time the SUGa. staff had declined to seven: "rnie Lodillan", George Bess*, Roy Shields*, Herman Kitchen, Amanda Bowens Perdew, Joyce Barrett, Gwin Brown, Tom Brown, John Perdew, Isaac Simpkins. (* means working an that time in Lississippi). "After the years in "outhwest Georgia, we feel the responsibility for deepening our project." --Joyce Barrett.

Although there was a desire to deepen the existing project at this point the remaining staff was completely demoralized, 'Emmobile, 'and disgusted, and thereby felt that eheir effort was in vain. I, personally, feel hhat this period was the most painfully frustrating in the history of SNCC in Southwest Georgia.

After Don Harris' return he unified the splintered staff and then announced that he "had resigned and was returning to school (in New York) to study law." This seems to have meant the destruction of SNCC in Georgia. "he job he haw done made him a living legend and his tremendous strength and leadership ability also projected him as a unique, indispensable character

(2)

of our staff. THEFE IS .. G.Port and its void will be hard as hell to fill.

"It times, the enormity of man's inhumanity crashes in on us. Even p people of good will through periods of feeling terribly alone because society can't bear to hear the truth about itself. As we reach into communities paralyzed by fear we say, 'We're not alone; many people care. But many times too many of our co-workers are indifferent."--Joyce Barrett.

This attitude is expressed in a phone conversation Don Harris had with

some SNCC people in Lississippi, which I overheard: voice on the other end: hello!'. Don: Hello, may I speak with John Lewis?

voice: He's outside. Don: Would you call him to the phone, please? voice: Bullets are flying, and I don't have time.

Another in a series of inicidents: I called Atlanta; after trying to contact Ruby Doris Smith via the wats operator, needless to say without success, I then called direct and the voice answered very cynically, "This is Freedom, blow it out."

ALBANY: Jim Parry - Roy Shields, Jr.

As I have previously stated the S ga. was demoralize, immoble and disgusted. And thereby unable to function effectively in their respective area. Therefore I felt it my responsible to eleavate this problem that caused this condition and in doing I found myself spending more time in the project areas. And trying to help Jim Ferry coordinate field activities from the Albany office. We have contributed time and materials to the "lbany movement ie., voter registration, the community center, pilot program for southern wursery School and Community Library.

A.ERICUS: Saumy mahone

Sammy wahone has been working in "unter Co. since the inception of the Sumter Co. Movement. Most of his tile is being spent on "community organizing ie, block level, geared to register more Negro and thereby giving them an institutional way of changing their adverse social condition. Sammy's main emphasis is the establishing an autonomous that is capable of sustaining itself and the powers that be.

CUTHBERT: Randy Battle - "rady Little

Randy and Grady are working on community mobilization and are using schools, streets and etc. around which to rally the people of handolph Go.. As we invision it this would not only activate a group, but also discussions which would theoretical result in act. and hopefully explore the political structure of the city, county, state, nation and the world. and its historical roots of how slavery developed into Jim Crow, Segregation, why Cuthbert is economically depressed.

CORDELE: Romona "ockett - Ruth Howard - Rev. Ulysses Fullwood - Judy Richardson

The main emphasis has been building adult involvement and organizing on "grass root level" the fegistered and unregistered Negroes of Crisp Co. into effective political, economic and social action group.

For the past months, Herman and Isage have been working to organize the community. People wouldn't work with them. In talking to the kids, they discovered that what they wanted was some action to improge the Negro High School, Bryant High (It has lost its accreditation, several of its building are endemned or substandard, it's overcorowded, there aren't enough desks or books or teachers, the campus is a sea of mud, among other things); they ta talked about a boycott. In Wed., Feb. 3., the kids spontaneously started a sit-in in the halls. By Thursday, it had developed into a full-fledged boycott, and later inot a protest march to the courthouse. When the kids returned to the school, the police were called, and 60 kids went to jail. That night, the adults got together and or_anized a Progressive wovement, to ne-

(4)

gotiate with the people in power. Negotiations have gone on since. The school board refuses to make more than token concessions, and the promises they've made in thepast have never been carried out. The kids are far mofe militant than the parents, and they have refused to go bake to school. The Superintendent of Schools has as of now (Wed., Feb. 10.) threatened to have all parents of kids who stay out of school arrested.

There are three lines of approach now open, the acceptance of the &chool Board's "concessions" (the leaders of the Progressive movement are getting soared and might try this); the march and fill the jails approach (Rev. Smith from albany, who has become unofficial chairman, supports this); and the send the kids back to school and go through the courts and the state Bd. of Educ. approach (a few of the SMCC staff support this). Most of the SMCC staff feels unable to make a decision one way or the other, and so the concensus was to present the arguments for staying in the boycott or returning to school to the kids and parents today and letting the make up their own minds. It was felt that there had been too much appeal to emotion by all sides, and not enough to reason. In any case, CD Kin has agreed to r present the participants.

Some of the toms felt that SNCO was corrupting the kids, and so should leave. In a vote of confidence last night, we won. There are now around eight to ten staff in moultrie while the crisis continues. At least, the people are now concerned and want to act. Direction is needed.

CCILLA - John Washington - Willie Ricks

-fter talking to leaders and mass meetings, and after conferences with the semi-active MAACP youth group, it was decided that what the people wanted was public accommodations testing, since most of Coilla's facilities still haven't desegregated. The first target was the one laundromat in town. Folice were present but offered no protection when local whites beat the kids. Interest in the community has increased as people have gone to jail. People

(5)

seem receptive to continued and increased testing. Adults have tested the laundromat on their own, soo. Other targets have been the segregated library and hospital. It seems that the main activity will continue to be gesting for wwhile, since there is more interest in this than anything else.

If Southwest Georgia is to maintain even its present state of limited effectiveness, certain things are going to be needed. 'or one thing, our supply of money has been erratic and scenty at beat. When three of our offces are lacking one or another of the three utilities, or a phone, it is apparent that some-thing is necessary. There are twenty counties in the 2nd Congressional District, and another thirteen Black Bélt counties in the adjoining 3rd District. we just cannot handle more than a token number of these with a dozen people, on car that muns (and one in Atlanta that's wrecked and not apaired and anothere one that Randy Battle is still trying to get so that it suns without people having to get out and push-start it every time it stalls), s sporadic subsistence (at least three of the projects have been existing almost entirely on the good-will of the communities, because they haven't been getting subsistence. In several otheres, subsistence checks have had to be used to keep the offices limping along).

The enclosed budget gives an idea of our <u>minimum</u> needs to maintain our tochold in the area. we have contacts in about a dozen counties other than the ones we are working in, but we just don't have the resources, either physical or human, to work in them on more than a hit and run basis. We need more people, trained organizers and people who can listen to local people learn the needs, and tailor programs to fit.

There are areas in Southwest Ga. that are as tough as any in ...iss. or Alabama, but there are also others that represent problems that SNCC is going to have to deal with increasingly often: areas where voting is relatively easy, and facilities are ostensibly integrated, but where the poor jobs-

(6)

poor education-poor conditions cycle remains unbroken. It doesn't seem that we of SNCC have really concentrated enough tills on these problems yet to have come up with many workable approaches, not to even speak of solutions (which probably don't exist at all yet). SLGa, can be a test case for our work and attempts to work on these problems.

We will continue to work in the ereas we have, and if we should have the resources we will expand into other Black Belt counties. "e will continue to work in the classical pattern of attempting to organize community organization of public accommodations and schools, boycotts of one kind or another. But we need new ideas.

Grady and Randy are going to start trying to bring in such things as ASCS, FH., ... ND War on Poverty material, all of which are new for us. But we need more.

In fact, considering the present disposition of SACC resources, and particularly the portion of them that we've got, it's more realistic for us to try to think of things we <u>don't</u> need, rather than those we do. "e haven't thought of anything yet that fits in such a category.

ESTIMATED MONTHLY BUDGET FOR SOUTHWEST GEORGIA, IN CRUSE TO EXIST IN TERMS OF MAINTAINING THE STATUS CUO.?
