Dear Friends,

We are sending all the information concerning the Beasley boycott. I feel that its very important for the Northern office to know exactly what's going on and exactly what has happened. The boycott has had much press coverage in many of the local and national papers. As you know most of the time the press will always give a distorted view of the truth and will just print the sensational side of the news. We hope this report will be of some help to the office staff and public.

Yours for Freedom,

John Buffington
Project Director
